## Analyzing a table

Write a report describing the information in the table below.

| Hours of leisure time per year in Someland |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Teens | 20 s | 30 s | 40 s | 50 s | $\mathbf{6 0 s}$ | 70 s + |
| Watching <br> TV/videos | 1,200 | 700 | 400 | 500 | 600 | 700 | 1,100 |
| Socialising with <br> 4or less people | 150 | 150 | 300 | 250 | 250 | 200 | 200 |
| Socialising with <br> or more <br> people | 350 | 350 | 50 | 50 | 25 | 25 | 25 |
| Individual <br> exercise | 150 | 100 | 200 | 200 | 50 | 75 | 150 |
| Group <br> exercise/sport | 450 | 350 | 200 | 150 | 50 | 0 | 0 |
| Cinema | 100 | 75 | 50 | 25 | 25 | 50 | 75 |

## Sample answers

Compare the two sample answers below. One is better than the other. How well does each one describe the table?

## Sample answer one

The table shows how people in different age groups spent their leisure time in Someland. It can be clearly seen that the amount of leisure time available varied considerably across the age groups.

Teenagers in Someland spent 1,200 hours a year watching TV and those in the over 70s group spent 100 hours less at 1,000 . They spent 150 hours on socialising with 4 or less people compared with 200 hours at the other end of the scale. They spent 350 hours socialising with 4 or more people compared with 25 hours. The teenagers spent 450 hours on group exercise but retired people didn't do any.

In conclusion, we can see that in Someland the teenagers and retired people prefer to spend their free time in different ways.

## Sample answer two

The table shows how people in different age groups spend their leisure time in Someland over the course of a year. It can be clearly seen that the amount of leisure time available varies considerably across the age groups and that people of different age levels have different ways of spending their leisure time.
According to the figures, as people age in Someland their social lives reduce. Teenagers and people in their twenties spend on average 500 hours per year on socialising and 350 hours of that time is with a group of more than 4 people. Although the total hours of socialising in their 30s, 40s, 50 s and 60 s is fairly constant (between $300-350$ ), socialising with more than 4 people drops dramatically to 50 hours in the 30 s and 40 s age groups and only 25 from 50 years old. Group and individual exercise follow a similar pattern.
People of all ages spend a good part of their leisure time on entertainment such as TV/video viewing and cinema. In both cases, teenagers and retired people spend around twice as much time as those who are at working age. Home entertainment ranges from just over a thousand hours for teenagers and retired people and an average of 600 hours for everyone else. Cinema accounts for 100 hours of the teenagers and retired people's leisure time and 25-50 hours for the rest.
In conclusion we can see there a significant trend towards solitary and smaller group activities as people grow older and that teenagers and retired people spend a lot more time on entertainment than those of working age do.
