Unit 2: Biometrics Role play: present your biometric system at a symposium

You are attending a symposium (colloque). You are **engineers** and you want to **present** your product. Your classmates will be **technical sellers** and you want to explain them how your recognition system works.

Did all go well?

Name of the system	Introduce the firm, the system to the audience	the system's functions Demonstrate to the technical sellers how it works. characteristics	Present diagrams charts, powerpoint slides (how many?) videos	Focus on the advantages of the system	ASSESSMENT	Enough research?	Documents well explained?	Could you take notes?

Help: use the past tense to give your opinion, I think, I believe, to me it was.....

Vocabulary: tool box

Positive assessment	Negative assessment
Quite neat,	They should have spoken about
It was well explained	The slides could have shown
It was quite well done!	The slides were not relevant
The power-point was rather precise and comprehensive. (complet)	It was rather poor
It was appropriate	It lacked precise information
It was quite interesting	They didn't mention the characteristics
It was a good idea	This system is quite useless.
It was a good thing to deal with this system	
This system is incredible it could improve your security, make life easier.	

What was/ were THE BEST?
