

Causes of environmental pollution

Examples of environmental pollution

Which pollution, do you think, is the most unbearable and why?

You can use the following vocabulary:

damage : dégâts	ozone layer : couche d'ozone
drought : sécheresse	waste : déchets
flood : inondation	to dispose of : se débarrasser de
fumes : émanations toxiques	destroy : détruire
greenhouse effect : effet de serre	harm : nuire à
hazard : danger	sustainable : durable

Environmental technology

Environmental technology tries to reduce and overcome the effects of pollution.

Match the pictures with the topics. Explain each of them:

1 	2 	3 
4 	5 	6 
a) Recycling	b) Water purification	c) Sewage treatment
d) Renewable energy	e) Flue gas treatment	f) Solid waste management

Environmentally friendly devices

In order to be environmentally friendly, your device must have a good efficiency (bon rendement), it must be reliable (fiable), and cost effective (rentable). At the end of its life, you need to recycle it. It mustn't be harmful for the environment.
